SHOOT BOLT LOCK

This heavy duty steel lock is specifically designed for the intermediate panels of a bi-fold door. The connecting rods shoot the bolts into the top and bottom tracks to secure the doors. The lock has options for securing with a key inside and outside as the situation demands. The lock is operated by use of a purpose made handle such as our Vivo or Verso range.

robust

SHOOT BOLT LOCK

Debar is a specialist bi-fold door hardware manufacturer with design innovation, manufacturing and distribution all carried out from our HQ in the UK. We distribute to hardware companies, door manufacturers and system houses around the globe. Operating to ISO 9001, Debar is recognised for its industry expertise and the quality of our products.

We supply the complete range of components for every bi-folding door requirement, including handles, locks, shoot bolt mechanisms, magnetic door holders, hinges & rollers.

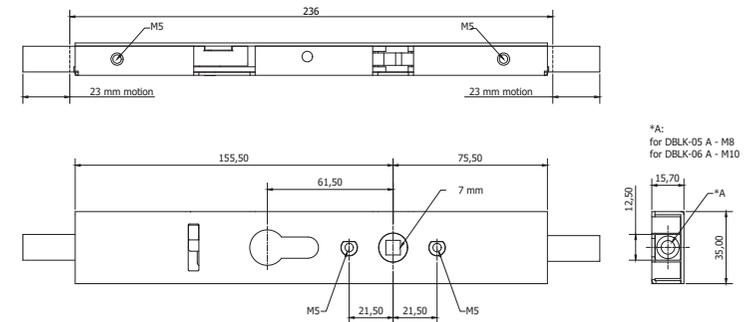

Features & Benefits

- Ideal for residential & commercial applications
- High grade corrosion resistant
- Allows any configuration of bi-fold door to have access from both inside & out, with or without Key/Cylinder
